“We prefer to work with family run businesses because decisions are made quicker, they are passionate about their businesses and are dedicated to mutual growth. We also have a policy to work with local companies in order to safeguard the environment”

David Mosley,
**Managing Director
Trojan Plastics**

Operating from Milnsbridge, Huddersfield, West Yorkshire, the manufacturing site has undergone a sustained and continued investment programme in modernising old mill buildings and the manufacturing equipment used to produce a quality product.

Trojan have dealt with MPM as a supplier for over 30 years and continue to do excellent business together. Since Trojan was founded in 1975 the philosophy of the company has remained the same, to produce a quality product using the best possible materials. This is what has led Trojan to continue to work with MPM who deliver quality and service on all orders.

MPM supply Trojan with several products both bespoke items and mass produced items.

Since 2006, MPM have supplied Trojan with over 20,000 fully wrapped round bath panels, allowing Trojan to maintain their high quality offering Europe wide. Also supplied is a master production mould for shower trays, which Trojan then take and produce the finished product. Each time a new design is launched, MPM are quick to make the new master on time and to the exact high quality finish.

The two companies work closely together to ensure the correct solution is provided, the relationship between the 2 companies could not be better.

Family run and passionate about business

High quality finish everytime

Quality and quantity at last

“In over 30 years of trading with MPM, I have never had cause to question or fault their quality and service. There was a seamless transition when Ben took the business over from his father in 2010, in fact we have seen, and continue to see a more proactive role from Ben and his team, which gives us the drive to grow our businesses together. Backed up by quality products, service and advice, we feel confident about the future together.”
